PayU money

Integrate in an Instant

Super fast way to place payment buttons into your website's pages

Step1. Paste this code in the final checkout page of your website from where your visitors will reach the payment gateway

```
<span class='pm-button' id='0EEFDBED4805677985F5D9F164E22218' onclick="window.PUM.pay()">
  <span class="state active">
    <input type="image" src="https://file.payumoney.com/images/payby_payumoney/new_buttons/2
1.png" width="131" height="37">
  </span>
  <span class="state clicked" style="display:none" >
    <input type="image" src="https://file.payumoney.com/images/payby_payumoney/new_buttons/su
bmitted/21.png" width="131" height="37">
  </span>
</span>
```

COPY CODE

Step 2. Paste this code inside the <head> tag of the same page to enable the button

```
<script src= "https://www.payumoney.com/Api/REST/op/buttonScript" async="true" > </script>
```

COPY CODE

Step 3. Use this javascript function to set the checkout amount, an order id and a product information

```
window.PUM.setData(Amount, OrderID,ProductInfo);
```
